

# Web Tool Integration Guide

## Start with a purpose not a tool....

This is an editable document. Please type in the boxes as needed

When you find a new webtool, use this proforma to plan its implementation into your teaching and learning cycle. Two great Webtool compilation sites are:

Cool Tools for Schools: <http://cooltoolsforschools.wikispaces.com/>

Edutecher: <http://www.edutecher.net/links.php>

Name of Tool: \_\_\_\_\_

URL of Tool: \_\_\_\_\_

	<ul style="list-style-type: none"><li>- <b>What</b> will you use it for?</li><li>- <b>What</b> QT Elements will it address?</li><li>- <b>What</b> outcomes do you want the students to show?</li><li>- <b>What</b> do you want to achieve?</li></ul>	
	<ul style="list-style-type: none"><li>- <b>Where</b> in your program does the tool fit?</li><li>- Is it an <b>assessment</b> or a <b>learning tool</b>?</li></ul>	
	<ul style="list-style-type: none"><li>- <b>When</b> will it work into your lessons plan?</li><li>- <b>When</b> will student present the work?</li></ul>	
	<ul style="list-style-type: none"><li>- <b>How</b> will it look in my lesson?</li><li>- <b>How</b> will I prepare for it? (Web filter checks, links to students, uploading resources?)</li><li>- <b>How</b> will it be marked?</li></ul>
